

BeMore:

**Where Research
underpins all that we do**

A unique firm delivering a complementary suite of search, insight, communication and culture solutions to a wide range of ambitious clients.

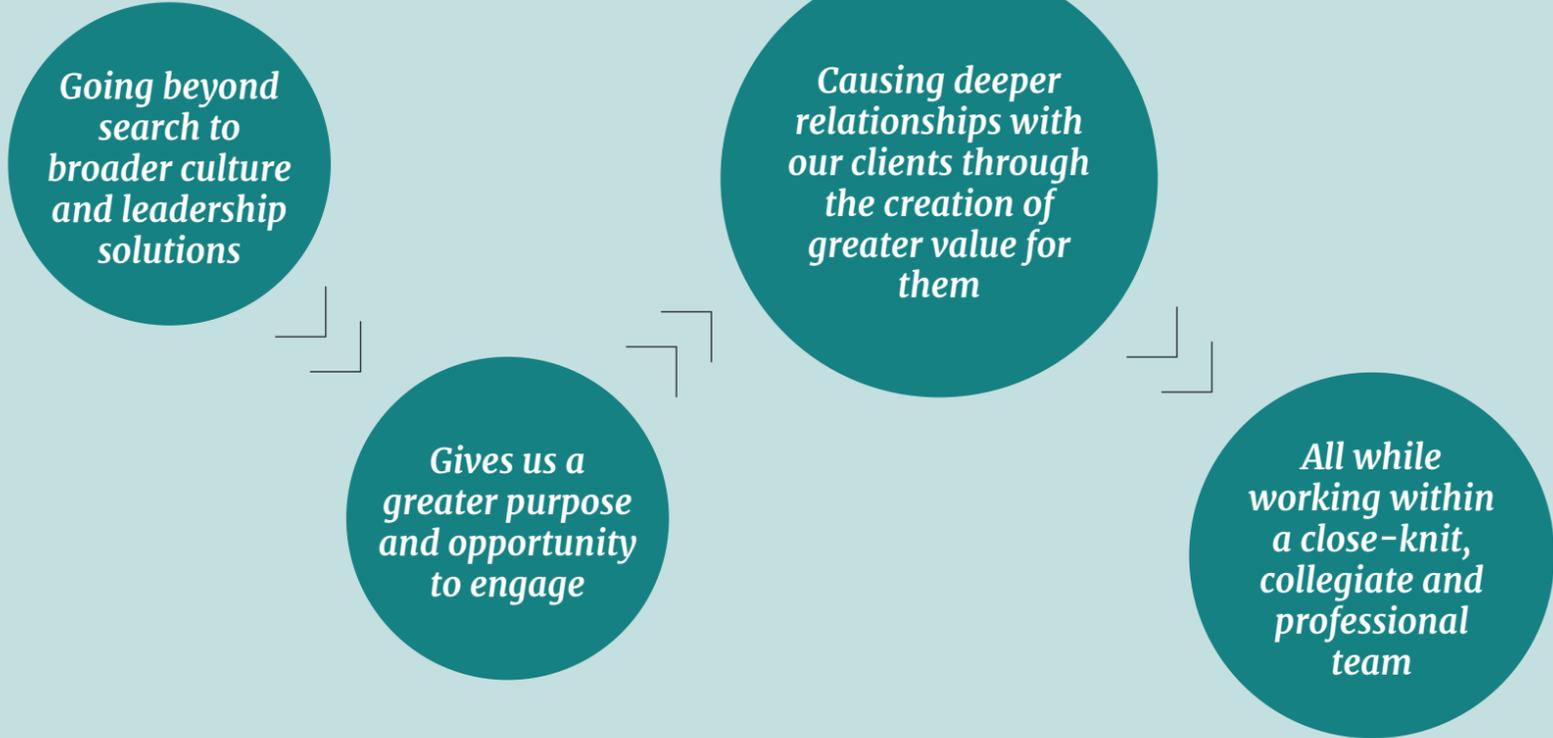

www.miles-advisory.com

We believe that the leaders we place are uniquely positioned to create tangible value for all their stakeholders. That they are as equally responsible for the environment, suppliers and communities they interact with, as they are for the success of the organisations and employees they lead.

We support organisations to find and acquire leaders who share this belief. And then we go beyond search, supporting through insight, communications and culture solutions that create highly aligned and engaged organisations.

“Our belief in this new opportunity for leaders, supported through a broader service offering, creates a more dynamic, rewarding and fulfilling work experience for our people.”

TINA STAINTON

Three strong reasons to build your Research career with us...

#1 The research role at Miles Advisory is wide ranging, always stimulating, frequently challenging and never dull.

We are unique in that our research team is closely involved in designing and delivering highly customised client solutions. It's way more than just search. Our range of offerings spans digital sourcing, targeted communications, leadership learning, cultural change and employer branding. As a researcher this means simply more scope, more exposure, more opportunity to be involved and more to learn.

“Working here is interesting, varied, challenging and rewarding. Every day is different”

GEMMA ROBERTSON

Three strong reasons to build your Research career with us...

#2 You'll belong more through our inclusive culture – how we are for each other.

What's unique about this is the way you'll feel here. It's in the way we work together. We're grown-up, outcomes focused, we all feel freedom to speak up, everyone's views are respected, we make time to listen, and we've got each other's backs. As a Researcher, this means more transparency, accountability, working for a firm that acts with strong ethics and that genuinely cares for its people.

“Here I have the opportunity to make a tangible difference and have my input valued”

JUNE WANG

“It’s exciting to be part of a growing business that is ambitious, adaptable and determined. One where we all make a real difference”

BEN DALAL

Three strong reasons to build your Research career with us...

#3 You’ll influence more through our core belief and ambition – why we exist and the difference we make for wider society.

What’s unique here is the opportunity you’ll have. We believe there’s a real opportunity to change an industry, because of this we’re growing and building something different. The individuals in the firm have the experience, agility and determination to succeed in a crowded marketplace. As a Researcher this means you’ll be part of a team that really does make a difference.

“We are high on confidence as a team but low on ego, we don’t tolerate sharp elbows – in essence we are a firm of grown ups”

DEBORAH COOPER

Our

People Deal

We have to be able to thrive in an environment of constant change. Navigating through frequently complex, often ambiguous but always energising, situations with pace and confidence.

So, as we launched, we consciously discussed the kind of culture we wanted to create. Agreeing that to make the most of our three possibilities of creating, belonging and influencing more, the values of proactivity, responsibility, entrepreneurialism and trust should guide the way we work together.

In looking for people who share our values we can be sure that everyone is able to fully feel part of our team, generate deeper, more valuable relationships and have a bigger influence through their work.

Join us to create more chances for you to develop personally as well as professionally. As you create more value for our clients through working on projects and programmes where solutions are blended to create bigger impact.

“Miles advisory embraces personal growth, innovation and entrepreneurship – all of which will elevate your development as a professional”
